(From Louisville Post.)

New York (Special Correspondence).—
Dr. Wallace Hadley, a well-known professor of chemistry of this city, has undoubtedly made the most sensational discovery of the age. Call it divine power, science, or whatever you will, the fact remains that in a single night, so to speak, he has completely upset modern medicine, defied all known laws of mature and utterity dum. celvable as above, and there have been issued additional bonds of a par value of \$5,987,500, making at this date (March completely upset modern medicine, deled all known laws of nature and utterly dum-founded scientists and medical men. Phy-sicians have sought out their worst cases and taken them to him, thinking they might find one be could not cure. discovery?" was asked by one who called to find out the secret of the tremendous furore he has created.

"Ever since I graduated from the medical department of the University of Buffalo," said the doctor, "I have been convinced that no discase should cause death. God has, in my judgment, provided a cure for every lill to which the human flesh is heir. Man must search and find this cure the same as man discovered the telegraph, the telephone, etc. The first thing I set out to do was to find the exact elements which compose a living being and sustain life, to discover the power which makes a man's heart beat and his body live. I next determined to extract these products from animal, mineral and chemical substances and combine them as they are found in a living being. I worked years, day and night, before I made any great progress. Then my discovery nearly all came at once. As soon as I made it I tried the preparations on myself, then I gave it to all the sick persons I could find. I notified doctors to send me their supposed incurable cases. The results were simply miraculous. They far exceeded my most sanguine hopes. I particularly remember the case of Mrs. Sarah Miller, No. 1500 Sixth street, Harrisburg, Pa. She was one of my first patients. The doctors had given her up to die. Har friends hourly expected to be called to her funeral. She was so bad the night she received my treatment she did not expect to live until morning. She took two doses: it revived her; she siept, she is living today. Here is a copy of a letter from her. Read it yourself."

The following abstract is taken verbatim from Mrs. Miller's letter. She says:

I am confident that you saved my li and had it not been for your marvelo treatment I should today be cold in r grave. I write this letter for the good humanity, that others may be induced try the wonderful treatment that he cured me."

"Do physicians take your treatment."
"Do physicians take your treatment?"
"They certainly do," said the doctor. "I am treating a large number now. Of course, they would not want you to publish their names, but here are their letters. You can read what they say. I cure them when all their own remedies fail. I have demonstrated beyond doubt that the most serious disease can be overcome. That the lives of thousands of men and women can be saved who have heretofore been carried off to the grave. I estimate that I shall save the lives of overone hundred thousand people the coming year who would otherwise have died an year who would otherwise have died ar untimely death."
"But how do you account for your won-

"But how do you account for your won-derful power over death?"
"Step this way," said the doctor, lead-ing the way into his large laboratory, "and I will show you the source of my power. I will explain to you the secret for which wise men have sought for ages."
"The doctor have nothed to a mysterious The doctor here pointed to a mysterior red fluid extract in a tightly corked gia flagon "This," said the doctor, "is ti Hagon This, said the doctor, is the apparently simple extract that has startle the civilized world. This is the powerful essence that has given me the titles. Divine Healer, 'Miracle Worker,' etc. C. course, I am nothing of the sort. I am scientist. My discovery is scientific. of fire shooting upward? They are hot flashes from magnetic wires attached to huge electric machines. It is by these processes that I abstract life from the materials of nature. Did you ever stop to think that wheat and corn come from the earth and air? If we knew the wonderful chemical secrets of nature we could make corn, wheat and other food from the earth and air. So my discovery of the vital principle of life is not so wonderful after all. I have merely found a secret law of nature which has been overlooked by doctors and scientists for centuries past."

"Do you give treatment to every one free? This, it seems, would be an enormous expense."

"Yes," said the doctor. "I offer a course of home treatment to every one who writes me now absolutely free of charge. Later I expect to charge a moderate fee. It will probably cost me several thousand dollars to give this free help, but I cau afford to do it, and, besides, I want to prove the miraculous power of my great discovery. Tell your readers to state the leading symptoms of their trouble, their age and sex, and I will diagnose their cases, write them fully in regard to the exact stage to which their disease has progressed, the length of time required to effect a cure and send them a course of treatment for their particular disease."

The viellor has taken Dr. Hadley's course of home treatment himself for a nervous affection, and he can personally youch for its wonderful efficacy. He also guarantees this offer to be absolutely getuine in every respect. All who wish to be healed should write Dr. Hadley at his took it, for otherwise I should not be here to write this letter. "It seems that sometimes a history of the doctor. "It seems that sometimes a divine hand directed these peor sufferers where to obtain relief. I believe that I was permitted to make this great discovery for the benefits of perfect health. Here is a letter from another woman whom I saved from the springs. Mich. writes: I tried soman whom I saved from another woman whom I saved from the springs. Mich. writes: I tried soman whom I saved from the springs. Mich. writes: I tried soman whom I saved from the grave. I tried somany remedies without obtaining relief that I had given up all hope of ever being cured. I heard of your wonderful discovery, but I had no faith in you, and was induced to give you a trial only on account of a strong letter received from a friend who had been cured by you. I was a physical wrock, ready for the grave. I had leart, stomach and bronchial trouble.

ARISE.

Some Information Purely and Simply for the Benefit of Suffering Humanity Given by Drs. Shores, the "People's Doctors."

Ozeana is a form or stage of Ca-tarrh that for centuries has been the subject of much dispute, and is one of the most difficult conditions to cure. In ancient times one unfortunate enough to be a sufferer from it was excluded from the privileges of priesthood, and in more modern days it has actually been ruled sufficient ground for divorce It is known under a host of names such as dysodia, rhinostenose, cory za foetida, fetid catarrh, dry ac-tarrh, stingnase, punaisie, rhinitis atraphica, rhinitis atrophica foetido, etc., but the most fitting of all appelations is perhaps the ancient one, oznena, which, in Greek, signifies a stench, and applied, means bad-smelling catarrh. It occurs in all diseases of the

mucous membrano of the nose where there is an ulceration and catarrhal poison from neglect or mistreatment, eats through the murotting away of the bone. It may result, too, from single cold in the head by decomposition of the mucous discharges if proper care and treatment is not used to keep the mucous lining of the throat and nose clean and healthy. While it is not necessary that every case of simple catarrh should result in this horrible condition—ozeana—it is an absolute fact that ozeana or "stinking catarrh" is always the sequel or legacy of neglected or, what amounts to the same, badly treated amounts to the same, Dady treated simple catarrh.
